

CS699 Research Progress Report – Team Situational Awareness

Benjamin Davis

4/26/2025

Since the last report I have completed the data collection. The data was generated using ChatGPT. This data is notional but will inform the models on how to function with agile software development and scrum. The data has been pushed to 4 sprints worth of data. The goal following the last report was to produce higher quality data that adheres more closely to industry practices. The corrections involved specifying the usage of the ceremonies and the roles different team members would take in the ceremonies. The daily standup meeting now produces data for a 15-minute period every working day while the Sprint planning, review, retrospective and backlog refinement only occur once per sprint with times of 2.5 hours, 2 hours, 1 hour, and 2 hours respectfully. Additionally, a lot of time was spent seeking to make the data more detailed and realistic. The other set has many duplicate phrases used between teammates with often no actual conversation happening, just statements between members. Utilizing prompt engineering I have a much more robust and realistic dataset. While there are still similar phrases or questions used between teammates the occurrences are less pronounced than before, and the communication is more conversational. I placed the iterations of the prompts and the final dataset at the bottom.

The next steps for the project will involve data cleaning, model training with the new data, result production, and then to begin assembly of the document with findings. This will take a significant amount of effort, however there will be a big push over the summer semester to complete these goals for the project

Below is the data generated:

1.0 (From last report)

Can you give me an excel spreadsheet with different tabs for each scrum meeting type. Make the data show the communication between team members with timestamps. The team should consist of 8 people with defined roles. The data should show all the meetings over the sprint. The sprint should consist of a 2 week time period. The data should be at least 300 lines for each ceremony. Make one more tab that shows the sprint metrics for the team. This team should not meet all their sprint goals and have some trouble communicating well

Can you give me an excel spreadsheet with different tabs for each scrum meeting type. Make the data show the communication between team members with timestamps. The team should consist of 8 people with defined roles. The data should show all the meetings over the sprint. The sprint should consist of a 2 week time period. The data should be at least 300 lines for each ceremony. Make one more tab that shows the sprint metrics for the team. This team should reach their sprint goals and communicate well.

2.0 (adjusted timebox for meetings, adjusted frequency of meetings, added more information to generate conversation data from)

Create an Excel spreadsheet with separate tabs for each Scrum meeting type, structured over 4 full 2-week sprints. Each tab should contain at least 300 lines of timestamped, realistic communication between team members.

Include the following ceremonies with timeboxed durations and frequencies:

Sprint Planning — once per sprint, 2.5 hours

Daily Standups — every weekday, 9:00–9:15 AM (15 minutes)

Backlog Refinement — once per sprint, 2 hours

Sprint Review — once per sprint, 2 hours

Sprint Retrospective — once per sprint, 1 hour

Communication should reflect authentic back-and-forth dialogue and not just status updates. Include:

Role-specific commentary (e.g., PO discussing scope, QA raising quality concerns, UX pushing for usability)

Collaborative discussions, questions, clarifications, quick agreements/disagreements

Side remarks, confirmations, small misunderstandings, and natural resolution

The Scrum team should consist of 8 members, each with a clear role and distinct communication style:

Lena (Scrum Master) – guiding, inclusive

Raj (Product Owner) – prioritizing, strategic

Maya (Developer) – enthusiastic, curious

Eli (Developer) – analytical, brief

Noah (Developer) – detailed, reflective

Jin (Developer) – quiet, technical

Zara (QA Engineer) – sharp, quality-focused

Sofia (UX Designer) – empathetic, user-driven

The team is high-performing and maintains effective communication, consistently meeting their sprint goals. Their discussions should reflect a mix of:

Collaboration and cross-functional problem-solving

Diverse personalities and tones

Occasional light conflict or differing viewpoints with constructive resolution

Additionally, include a Sprint Metrics tab per sprint summarizing:

Velocity (story points completed)

Sprint Goal Completion (Yes/Partial/No)

Bugs Found vs. Resolved

Team Morale (qualitative rating or quotes)

Communication Effectiveness (qualitative insights)

2.1 (tried to define communication guidelines as suggested by the model)

Create an Excel spreadsheet with separate tabs for each Scrum meeting type across 4 full 2-week sprints. Each tab must include at least 300 lines of timestamped team communication that is natural, collaborative, and discussion-based.

Include the following Scrum ceremonies, each with a defined frequency and timebox:

Daily Standup – 9:00–9:15 AM (15 minutes), every weekday

Sprint Planning – once per sprint, 2.5 hours

Backlog Refinement – once per sprint, 2 hours

Sprint Review – once per sprint, 2 hours

Sprint Retrospective – once per sprint, 1 hour

The team includes 8 members with unique roles and communication styles:

Lena (Scrum Master) – guiding, inclusive

Raj (Product Owner) – prioritizing, strategic

Maya (Developer) – enthusiastic, curious

Eli (Developer) – analytical, brief

Noah (Developer) – detailed, reflective

Jin (Developer) – quiet, technical

Zara (QA Engineer) – sharp, quality-focused

Sofia (UX Designer) – empathetic, user-driven

Communication Guidelines:

Messages should include natural back-and-forth dialogue (e.g., A asks a question, B responds, C offers a clarification).

Include follow-ups, agreements, disagreements, clarifications, questions, acknowledgments, and side discussions.

Vary sentence structure and vocabulary—avoid repeating phrases or patterns.

Each team member’s voice should reflect their personality and role (e.g., developers might be more technical, the UX designer more user-focused, the Scrum Master more facilitative).

Use realistic tone: casual but professional, with occasional use of emojis or shorthand for certain personalities (e.g., “👍”, “np”, “lmk”).

Include collaborative interactions (e.g., “Can we pair on this later?”, “That’s a good catch—I’ll tweak the logic.”, “Let’s sync after the meeting.”).

The team is high-functioning, consistently achieving their sprint goals, and values transparency, quality, and user experience.

Add a final tab for Sprint Metrics, with data for each sprint:

Velocity (story points)

Sprint Goal Completion (Yes/Partial/No)

Bugs Found vs. Resolved

Team Morale (qualitative)

Communication Effectiveness (qualitative)

2.2 (Better defined meeting purposes to encourage proper conversation topics in that data)

Create an Excel spreadsheet with separate tabs for each Scrum meeting type across 4 full 2-week sprints. Each tab must include at least 300 lines of timestamped team communication that is natural, collaborative, and discussion-based.

Include the following Scrum ceremonies, each with a defined frequency and timebox:

Daily Standup – 9:00–9:15 AM (15 minutes), every weekday - Purpose is to give everyone's daily status, plan for the day, and resolve any team blockers

Sprint Planning – once per sprint, 2.5 hours - Used to plan the work for the next sprint

Backlog Refinement – once per sprint, 2 hours - Used to plan the future work in the backlog

Sprint Review – once per sprint, 2 hours - Used to show off/present the work that was completed, usually has demos and feedback from other stakeholders like the customer or product owner

Sprint Retrospective – once per sprint, 1 hour - Used to discuss things that went poorly and things that went well during the sprint and make adjustments to the way the team conducts work for future sprints, should include dialogue that has complaints or suggestions for changes or encouragement for the team

The team includes 8 members with unique roles and communication styles:

Lena (Scrum Master) – guiding, inclusive

Raj (Product Owner) – prioritizing, strategic

Maya (Developer) – enthusiastic, curious

Eli (Developer) – analytical, brief

Noah (Developer) – detailed, reflective

Jin (Developer) – quiet, technical

Zara (QA Engineer) – sharp, quality-focused

Sofia (UX Designer) – empathetic, user-driven

Communication Guidelines: make the communication interesting

Messages should include natural back-and-forth dialogue (e.g., A asks a question, B responds, C offers a clarification). The Scrum master should facilitate the daily scrum.

Include follow-ups, agreements, disagreements, clarifications, questions, acknowledgments, and side discussions between team members.

Vary sentence structure and vocabulary—avoid repeating phrases or patterns.

Each team member’s voice should reflect their personality and role (e.g., developers might be more technical, the UX designer more user-focused, the Scrum Master more facilitative).

Use realistic tone: casual but professional, with occasional use of shorthand for certain personalities (e.g., “np”, “lmk”).

Include collaborative interactions (e.g., “Can we pair on this later?”, “That’s a good catch—I’ll tweak the logic.”, “Let’s sync after the meeting.”).

The team is high-functioning, consistently achieving their sprint goals, and values transparency, quality, and user experience.

Add a final tab for Sprint Metrics, with data for each sprint:

Velocity (story points)

Sprint Goal Completion (Yes/Partial/No)

Bugs Found vs. Resolved

Team Morale (qualitative)

Communication Effectiveness (qualitative)

2.3 (Trying to remove sentence duplicates and vary communication)

Create an Excel spreadsheet with separate tabs for each Scrum meeting type across 4 full 2-week sprints. Each tab must include at least 300 lines of timestamped team communication that is natural, collaborative, and discussion-based.

Include the following Scrum ceremonies, each with a defined frequency and timebox:

Daily Standup – 9:00–9:15 AM (15 minutes), every weekday - Purpose is to give everyone's daily status, plan for the day, and resolve any team blockers

Sprint Planning – once per sprint, 2.5 hours - Used to plan the work for the next sprint

Backlog Refinement – once per sprint, 2 hours - Used to plan the future work in the backlog

Sprint Review – once per sprint, 2 hours - Used to show off/present the work that was completed, usually has demos and feedback from other stakeholders like the customer or product owner

Sprint Retrospective – once per sprint, 1 hour - Used to discuss things that went poorly and things that went well during the sprint and make adjustments to the way the team conducts work for future sprints, should include dialogue that has complaints or suggestions for changes or encouragement for the team

The team includes 8 members with unique roles and communication styles:

Lena (Scrum Master) – guiding, inclusive

Raj (Product Owner) – prioritizing, strategic

Maya (Developer) – enthusiastic, curious

Eli (Developer) – analytical, brief

Noah (Developer) – detailed, reflective

Jin (Developer) – quiet, technical

Zara (QA Engineer) – sharp, quality-focused

Sofia (UX Designer) – empathetic, user-driven

Communication Guidelines: make the communication interesting

Messages should include natural back-and-forth dialogue (e.g., A asks a question, B responds, C offers a clarification). The Scrum master should facilitate the daily scrum.

Include follow-ups, agreements, disagreements, clarifications, questions, acknowledgments, and side discussions between team members.

Vary sentence structure and vocabulary—avoid repeating phrases or patterns. There should not be duplicate phrases within the same meeting.

Each team member’s voice should reflect their personality and role (e.g., developers might be more technical, the UX designer more user-focused, the Scrum Master more facilitative).

Use realistic tone: casual but professional, with occasional use of shorthand for certain personalities (e.g., “np”, “lmk”).

Include collaborative interactions (e.g., “Can we pair on this later?”, “That’s a good catch—I’ll tweak the logic.”, “Let’s sync after the meeting.”).

The team is high-functioning, consistently achieving their sprint goals, and values transparency, quality, and user experience.

Add a final tab for Sprint Metrics, with data for each sprint:

Velocity (story points)

Sprint Goal Completion (Yes/Partial/No)

Bugs Found vs. Resolved

Team Morale (qualitative)

Communication Effectiveness (qualitative)

NEGATIVE CASE:

Create an Excel spreadsheet with separate tabs for each Scrum meeting type across 4 full 2-week sprints. Each tab must include at least 300 lines of timestamped team communication that is natural, collaborative, and discussion-based.

Include the following Scrum ceremonies, each with a defined frequency and timebox:

Daily Standup – 9:00–9:15 AM (15 minutes), every weekday - Purpose is to give everyone’s daily status, plan for the day, and resolve any team blockers

Sprint Planning – once per sprint, 2.5 hours - Used to plan the work for the next sprint

Backlog Refinement – once per sprint, 2 hours - Used to plan the future work in the backlog

Sprint Review – once per sprint, 2 hours - Used to show off/present the work that was completed, usually has demos and feedback from other stakeholders like the customer or product owner

Sprint Retrospective – once per sprint, 1 hour - Used to discuss things that went poorly and things that went well during the sprint and make adjustments to the way the team conducts work for future sprints, should include dialogue that has complaints or suggestions for changes or encouragement for the team

The team includes 8 members with unique roles and communication styles:

Lena (Scrum Master) – guiding, inclusive

Raj (Product Owner) – prioritizing, strategic

Maya (Developer) – enthusiastic, curious

Eli (Developer) – analytical, brief

Noah (Developer) – detailed, reflective

Jin (Developer) – quiet, technical

Zara (QA Engineer) – sharp, quality-focused

Sofia (UX Designer) – empathetic, user-driven

Communication Guidelines: make the communication interesting

Messages should include natural back-and-forth dialogue (e.g., A asks a question, B responds, C offers a clarification). The Scrum master should facilitate the daily scrum.

Include follow-ups, agreements, disagreements, clarifications, questions, acknowledgments, and side discussions between team members.

Vary sentence structure and vocabulary—avoid repeating phrases or patterns. There should not be duplicate phrases within the same meeting.

Each team member's voice should reflect their personality and role (e.g., developers might be more technical, the UX designer more user-focused, the Scrum Master more facilitative).

Use realistic tone: casual but professional, with occasional use of shorthand for certain personalities (e.g., “np”, “lmk”).

Include collaborative interactions (e.g., “Can we pair on this later?”, “That’s a good catch—I’ll tweak the logic.”, “Let’s sync after the meeting.”).

The team is medium-functioning, they struggle to meet their sprint goals, and don’t have all their priorities in alignment.

Add a final tab for Sprint Metrics, with data for each sprint:

Velocity (story points)

Sprint Goal Completion (Yes/Partial/No)

Bugs Found vs. Resolved

Team Morale (qualitative)

Communication Effectiveness (qualitative)

2.4 (Make the data more conversational with directed statements and responses to those statements)

Create an Excel spreadsheet with separate tabs for each Scrum meeting type across 4 full 2-week sprints. Each tab must include at least 300 lines of timestamped team communication that is natural, collaborative, and discussion-based.

Include the following Scrum ceremonies, each with a defined frequency and timebox:

Daily Standup – 9:00–9:15 AM (15 minutes), every weekday - Purpose is to give everyone daily status, plan for the day, and resolve any team blockers. The Scrum master should facilitate the daily scrum.

Sprint Planning – once per sprint, 2.5 hours - Used to plan the work for the next sprint

Backlog Refinement – once per sprint, 2 hours - Used to plan the future work in the backlog

Sprint Review – once per sprint, 2 hours - Used to show off/present the work that was completed, usually has demos and feedback from other stakeholders like the customer or product owner

Sprint Retrospective – once per sprint, 1 hour - Used to discuss things that went poorly and things that went well during the sprint and make adjustments to the way the team conducts work for future sprints, should include dialogue that has complaints or suggestions for changes or encouragements for the team

The team includes 8 members with unique roles and communication styles:

Lena (Scrum Master) – guiding, inclusive

Raj (Product Owner) – prioritizing, strategic

Maya (Developer) – enthusiastic, curious

Eli (Developer) – analytical, brief

Noah (Developer) – detailed, reflective

Jin (Developer) – quiet, technical

Zara (QA Engineer) – sharp, quality-focused

Sofia (UX Designer) – empathetic, user-driven

Communication Guidelines: make the communication interesting

Messages should include natural back-and-forth dialogue (e.g., A asks a question, B responds, C offers a clarification). The statements made should be directed at another individual with a response made as in a normal conversational pattern.

Include follow-ups, agreements, disagreements, clarifications, questions, acknowledgments, and side discussions between team members.

Vary sentence structure and vocabulary—avoid repeating phrases or patterns. There should not be duplicates in the dataset.

Each team member’s voice should reflect their personality and role (e.g., developers might be more technical, the UX designer more user-focused, the Scrum Master more facilitation).

Use realistic tone: casual but professional, with occasional use of shorthand for certain personalities (e.g., “np”, “lmk”).

Include collaborative interactions (e.g., “Can we pair on this later?”, “That’s a good catch—I’ll tweak the logic.”, “Let’s sync after the meeting.”).

The team is high-functioning, consistently achieving their sprint goals, and values transparency, quality, and user experience.

Add a final tab for Sprint Metrics, with data for each sprint:

Velocity (story points)

Sprint Goal Completion (Yes/Partial/No)

Bugs Found vs. Resolved

Team Morale (qualitative)

Communication Effectiveness (qualitative)

Sample data:

Daily Standup

	A	B	C	D	E	F
1	Sprint	Date	Timestamp	Name	Role	Message
2		1 2024-01-01 09:00:00		Lena	Scrum Master	Lena (Scrum Master): Jin, quick update — mobile responsiveness tweaks are almost done...
3		1 2024-01-01 09:00:03		Jin	Developer	Jin (Developer): Lena, quick update — mobile responsiveness tweaks are almost done.
4		1 2024-01-01 09:00:06		Lena	Scrum Master	Lena (Scrum Master): Hey Zara, yesterday I finished the login fixes! Today I'll tackle the dashboard issues! Need a review later right?
5		1 2024-01-01 09:00:09		Zara	QA Engineer	Zara (QA Engineer): Lena, no blockers today — will finalize the reporting module by noon...
6		1 2024-01-01 09:00:12		Noah	Developer	Noah (Developer): Eli, do you have bandwidth to help with the test coverage later — agree?
7		1 2024-01-01 09:00:15		Eli	Developer	Eli (Developer): Hey Noah, yesterday I finished the login fixes! Today I'll tackle the dashboard issues! Need a review later right?
8		1 2024-01-01 09:00:18		Noah	Developer	Noah (Developer): Hey Eli, yesterday I finished the login fixes! Today I'll tackle the dashboard issues! Need a review later — agree — thoughts?
9		1 2024-01-01 09:00:21		Eli	Developer	Eli (Developer): Noah, quick update — mobile responsiveness tweaks are almost done...
10		1 2024-01-01 09:00:24		Eli	Developer	Eli (Developer): Sofia, no blockers today — will finalize the reporting module by noon!
11		1 2024-01-01 09:00:27		Sofia	UX Designer	Sofia (UX Designer): Hey Eli, yesterday I finished the login fixes. Today I'll tackle the dashboard issues. Need a review later?
12		1 2024-01-01 09:00:30		Raj	Product Owner	Raj (Product Owner): Zara, do you have bandwidth to help with the test coverage later right agree?
13		1 2024-01-01 09:00:33		Zara	QA Engineer	Zara (QA Engineer): Raj, can you double-check the staging deploy — thoughts right? I hit a snag this morning — just fyi.
14		1 2024-01-01 09:00:36		Eli	Developer	Eli (Developer): Sofia, quick update — mobile responsiveness tweaks are almost done — just fyi.

Sprint Planning

	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q
1	Sprint	Date	Timestamp	Name	Role	Message											
2		1 2024-01-01 10:00:00		Raj	Product Owner	Raj (Product Owner): Zara, are we aligned on moving the feature toggle story into this sprint — thoughts agree?											
3		1 2024-01-01 10:00:30		Zara	QA Engineer	Zara (QA Engineer): Raj, suggesting we reduce scope for mobile auth if time gets tight! Thoughts right agree?											
4		1 2024-01-01 10:01:00		Noah	Developer	Noah (Developer): Lena, should we prioritize technical debt items now or later right what do you think?											
5		1 2024-01-01 10:01:30		Lena	Scrum Master	Lena (Scrum Master): Noah, suggesting we reduce scope for mobile auth if time gets tight! Thoughts — agree?											
6		1 2024-01-01 10:02:00		Eli	Developer	Eli (Developer): Zara, should we prioritize technical debt items now or later agree?											
7		1 2024-01-01 10:02:30		Zara	QA Engineer	Zara (QA Engineer): Quick thing Eli: do we need a separate story for backend validation — agree agree?											
8		1 2024-01-01 10:03:00		Lena	Scrum Master	Lena (Scrum Master): Maya, should we prioritize technical debt items now or later right — thoughts?											
9		1 2024-01-01 10:03:30		Maya	Developer	Maya (Developer): Quick thing Lena: do we need a separate story for backend validation — agree agree?											
10		1 2024-01-01 10:04:00		Sofia	UX Designer	Sofia (UX Designer): Quick thing Raj: do we need a separate story for backend validation — thoughts what do you think?											
11		1 2024-01-01 10:04:30		Raj	Product Owner	Raj (Product Owner): Sofia, suggesting we reduce scope for mobile auth if time gets tight! Thoughts — thoughts what do you think?											
12		1 2024-01-01 10:05:00		Lena	Scrum Master	Lena (Scrum Master): Sofia, are we aligned on moving the feature toggle story into this sprint — thoughts what do you think?											

Backlog Refinement

	A	B	C	D	E	F
1	Sprint	Date	Timestamp	Name	Role	Message
2		1 2024-01-01 10:00:00		Zara	QA Engineer	Zara (QA Engineer): Maya, tagging this as low priority — push to next sprint right?
3		1 2024-01-01 10:00:24		Maya	Developer	Maya (Developer): Zara, looks oversized — want to split it into two smaller stories agree?
4		1 2024-01-01 10:00:48		Jin	Developer	Jin (Developer): Eli, looks oversized — want to split it into two smaller stories right — thoughts?
5		1 2024-01-01 10:01:12		Eli	Developer	Eli (Developer): Jin, thinking the acceptance criteria might need usability points...
6		1 2024-01-01 10:01:36		Raj	Product Owner	Raj (Product Owner): Maya, do we need a separate spike for dependency mapping here — thoughts?
7		1 2024-01-01 10:02:00		Maya	Developer	Maya (Developer): Raj, tagging this as low priority — push to next sprint right agree?
8		1 2024-01-01 10:02:24		Eli	Developer	Eli (Developer): Maya, do we need a separate spike for dependency mapping here right agree?
9		1 2024-01-01 10:02:48		Maya	Developer	Maya (Developer): Eli, tagging this as low priority — push to next sprint — thoughts — thoughts?
10		1 2024-01-01 10:03:12		Jin	Developer	Jin (Developer): Sofia, do we need a separate spike for dependency mapping here — agree?

Sprint Review

	A	B	C	D	E	F
1	Sprint	Date	Timestamp	Name	Role	Message
2		1 2024-01-01 10:00:00		Sofia	UX Designer	Sofia (UX Designer): Maya, walking through the new notifications UI — just fyi. Looks good on staging — thoughts agree?
3		1 2024-01-01 10:00:24		Maya	Developer	Maya (Developer): Sofia, showing the dashboard refresh — curious if the KPIs load fast enough for you...
4		1 2024-01-01 10:00:48		Noah	Developer	Noah (Developer): Jin, walking through the new notifications UI. Looks good on staging right right?
5		1 2024-01-01 10:01:12		Jin	Developer	Jin (Developer): Noah, sharing analytics module updates — real-time graphs seem smoother now...
6		1 2024-01-01 10:01:36		Raj	Product Owner	Raj (Product Owner): Noah, showing the dashboard refresh — curious if the KPIs load fast enough for you...
7		1 2024-01-01 10:02:00		Noah	Developer	Noah (Developer): Raj, sharing analytics module updates — real-time graphs seem smoother now!
8		1 2024-01-01 10:02:24		Eli	Developer	Eli (Developer): Jin, here's the checkout experience — fixed mobile scaling issues as well — just fyi.
9		1 2024-01-01 10:02:48		Jin	Developer	Jin (Developer): Eli, sharing analytics module updates — real-time graphs seem smoother now.
10		1 2024-01-01 10:03:12		Noah	Developer	Noah (Developer): Lena, demoing the export feature — minor bugs still exist, flagged for next sprint!
11		1 2024-01-01 10:03:36		Lena	Scrum Master	Lena (Scrum Master): Noah, showing the dashboard refresh — curious if the KPIs load fast enough for you — just fyi.

Sprint Retrospective

	A	B	C	D	E	F
1	Sprint	Date	Timestamp	Name	Role	Message
2	1	2024-01-01	10:00:00	Jin	Develope	Jin (Developer): Eli, maybe we timebox bug triage sessions tighter next sprint right — thoughts?
3	1	2024-01-01	10:00:12	Eli	Develope	Eli (Developer): Hey Jin, standups were super efficient — appreciated that!
4	1	2024-01-01	10:00:24	Eli	Develope	Eli (Developer): Jin, noted a few unclear requirements early sprint — maybe more PO syncs — thoughts what do you thir
5	1	2024-01-01	10:00:36	Jin	Develope	Jin (Developer): Eli, maybe we timebox bug triage sessions tighter next sprint — thoughts?
6	1	2024-01-01	10:00:48	Lena	Scrum Ma	Lena (Scrum Master): Eli, maybe we timebox bug triage sessions tighter next sprint right — thoughts?
7	1	2024-01-01	10:01:00	Eli	Develope	Eli (Developer): Lena, great job rallying the team mid-sprint when we hit blockers...
8	1	2024-01-01	10:01:12	Sofia	UX Design	Sofia (UX Designer): Zara, great job rallying the team mid-sprint when we hit blockers.
9	1	2024-01-01	10:01:24	Zara	QA Engine	Zara (QA Engineer): Sofia, felt story estimation improved a lot this sprint! Nice work everyone!
10	1	2024-01-01	10:01:36	Lena	Scrum Ma	Lena (Scrum Master): Eli, great job rallying the team mid-sprint when we hit blockers!
11	1	2024-01-01	10:01:48	Eli	Develope	Eli (Developer): Lena, felt story estimation improved a lot this sprint — just fyi. Nice work everyone!
12	1	2024-01-01	10:02:00	Raj	Product O	Raj (Product Owner): Jin, felt story estimation improved a lot this sprint... Nice work everyone!
13	1	2024-01-01	10:02:12	Jin	Develope	Jin (Developer): Hey Raj, standups were super efficient — appreciated that!
14	1	2024-01-01	10:02:24	Eli	Develope	Eli (Developer): Jin, noted a few unclear requirements early sprint — maybe more PO syncs — agree agree?
15	1	2024-01-01	10:02:36	Jin	Develope	Jin (Developer): Eli, great job rallying the team mid-sprint when we hit blockers...

Sprint Metrics

	A	B	C	D	E	F	G
1	Sprint	Velocity (story points)	Sprint Goal Completion	Bugs Found	Bugs Resolved	Team Morale	Communication Effectiveness
2	1		55 Yes	5	4	Very High	Strong
3	2		60 Yes	4	3	Very High	Strong
4	3		53 Yes	7	5	Very High	Very Effective
5	4		56 Yes	3	5	Positive	Excellent
